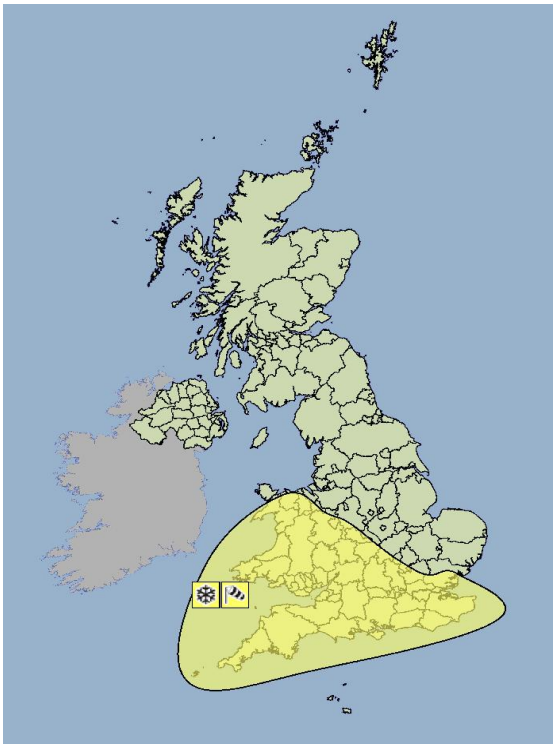
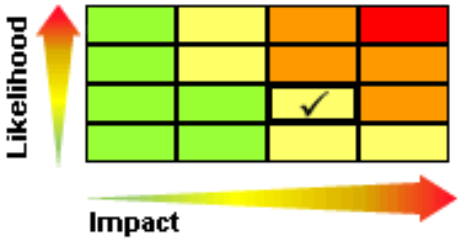
National Severe Weather Warning Service





Chief Forecasters Assessment
A weather system is expected to move slowly north through Thursday, initially affecting the south of the warning area before intensifying and pushing north across the rest of the area later on. As it comes into contact with the very cold air resident over the UK, it has potential to produce widespread snow, accompanied by strong to gale force easterly winds.

Around 2-5 cm of snow is expected to fall in places, while some places could see gusts of 50 to 60 mph. Note that a higher likelihood of impacts is covered by a separate Amber warning across parts of Wales and southwest England.

This warning has been updated to add parts of southeast England where localised falls of a few cm of snow are possible, with gusts perhaps to around 50 mph.

The Met Office have issued a **Yellow Warning** of **Wind and Snow**

Valid from **08:00 on Thu, 01st Mar 2018** until **23:55 on Thu, 01st Mar 2018**

A spell of snow, heavy in places, will move slowly north from Thursday morning onwards. The snow will be accompanied by strong to gale winds quite widely, leading to the potential for drifting of lying snow.

Delays and cancellations to public transport are possible, as are delays on some roads. Interruptions to power supplies and mobile phone coverage are also possible.
